linkedin.com/in/rahul-lanka-ag7387168 | github.com/rahul-lanka

Skills

Languages

JavaScript (ES6+)
TypeScript
Java
SQL

Frontend

React.js, React Hooks
HTML5, CSS3, Tailwind CSS
Storybook, Responsive Design
State Management

Backend

Node.js, REST APIs
Supabase (PostgreSQL)
Firebase, Authentication

Tools

Git, GitHub, Postman
GitHub Actions, Docker
AWS, GCP
Vercel, Netlify
Jira, Confluence, Jest
Android Studio

Concepts

Data Structures & Algorithms
Performance Optimization
Offline-first Architecture
Agile Scrum
System Design
Problem Solving

Education

M.Sc. Computer Science

Government Arts College
Rajahmundry | Mar 2021
GPA: 8.91

B.Sc. Computer Science

D.N.R. Degree College
Bhimavaram | Mar 2019
GPA: 7.67

Achievements

Top 2% in AccioJob Week of Code
Improved app performance by 60%
Automated onboarding by 90%

Summary

Full Stack Engineer with 3+ years of experience building scalable web and mobile applications using React, TypeScript, Node.js, PostgreSQL, Supabase, Firebase, and LLM-powered applications. Experienced in frontend architecture, offline-first systems, performance optimization, REST APIs, authentication, CI/CD automation, and AI-assisted product development.

Experience

Chimple Learning | Software Engineer | React | TypeScript | Supabase | Firebase | Node.js

Apr 2023 – Present | Bengaluru, India

- Architected Firebase-to-Supabase (PostgreSQL) backend migration, improving scalability and offline sync — reducing data fetch latency by 40% across 500+ schools.
- Implemented Ops Mode to automate onboarding of schools, classes, and students via Excel uploads, reducing manual work by 90%.
- Engineered pagination, lazy loading, and optimized rendering strategies for lesson modules, improving frontend performance and reducing load time by 60%.
- Redesigned adaptive Learning Pathway workflows, developed interactive avatar animations, and implemented offline-first lesson synchronization using Supabase caching.
- Implemented automated WhatsApp report generation using Canvas APIs and scheduled notifications for student activity monitoring.
- Designed and implemented Supabase Row Level Security (RLS) policies for secure role-based data access.
- Optimized application performance for low-memory Android devices (1GB RAM), reducing WebView crashes and improving runtime stability.
- Integrated Storybook for UI documentation and visual testing, reducing frontend regressions by 30%.
- Contributed to Agile sprint delivery through peer code reviews, Git workflows, pull request validations, and CI/CD automation using GitHub Actions.

Enhops | QA & Automation Intern

Jul 2022 – Apr 2023 | Hyderabad, India

- Designed and executed 100+ functional, regression, and E2E test scenarios, achieving 95% test coverage across core flows.
- Performed defect tracking, retesting, and validation across Agile sprint cycles to ensure application reliability and release quality.

Projects

Ops Automation System | React | Supabase | TypeScript

- Built an onboarding automation platform using React and Supabase with Excel validation, API integration, and role-based workflows for schools and students.

Chimple Learning App | React | TypeScript | Firebase | Supabase

- Developed a React + TypeScript learning platform with offline synchronization, Supabase integration, responsive dashboards, and performance-optimized modules.

Photographer Portfolio Website (Live Site) | JavaScript | HTML | CSS

- Developed a responsive multi-page portfolio website with optimized UI layouts, reusable components, and mobile-friendly design.

Aptus ATS Resume Analyzer (Live Site) | React | TypeScript | Gemini API

- Built an ATS resume analyzer with keyword matching, ATS scoring, skill gap analysis, and AI-powered resume improvement suggestions.
